*The Power of the Media in Health Communication* Feb 08 2021

Health is a contested concept that has been defined in numerous ways. The media is extremely powerful in promoting health beliefs and in creating role models for contemporary people. The ways in which health is defined or understood can have wide-ranging implications and can have an impact on issues such as health promotion or health literacy. Health presentation in the media has a significant social impact because this type of message is important in changing people's beliefs, attitudes and behaviours relating to health and in promoting health-related knowledge among the target audience. The present volume provides an interdisciplinary and multicultural contemporary approach to the controversial link between medicine and media. The authors that have contributed to this volume analyse the media and medicine from different perspectives and different countries (USA, UK, Portugal, Turkey, Taiwan, Mexico, Estonia, Romania), thus offering a re-positioning of the study of media and medicine. The new perspectives offered by this volume will be of interest to any health communication or media studies student or academic since they bring to light new ideas, new methodologies and new results.

**Text Representation** May 23 2022 This book brings together linguistics and psycholinguistics. Text representation is considered a cognitive entity: a mental construct that plays a crucial role in both text production and text understanding. The focus is on referential and relational coherence and the role of linguistic characteristics as processing instructions from a text linguistic and discourse psychology point of view. Consequently, this book presents various research methodologies: linguistic analysis, text analysis, corpus linguistics, computational linguistics, argumentation analysis, and the experimental psycholinguistic study of text processing. The authors compare, test, and evaluate linguistic and processing theories of text representation. A state of the art volume in an emerging field of interest, located at the very heart of our communicative behavior: the study of text and text representation.

Annual Report Jul 25 2022

*Finding the End of the World* Feb 20 2022 Learn tools and techniques you can use in any Biblical study and then explore the History of Israel. Use what you learn to analyze Old Testament prophecies and apocalyptic writings - all in preparation for comparing accounts of what Jesus told His disciples on the Mount of Olives and for analyzing the Revelation given to John. Round out your experience with in-depth studies of end-times players such as the Antichrist and the 144,000 'redeemed from the earth'. Finally, explore in great detail the major rapture positions and challenges presented by each. Ron Braley's book, *Finding the End of the World*, is a great resource for any serious student of God's Word. However, it will frustrate those who look to it for easy answers to questions surrounding the books of Daniel and Revelation, events of the End Times, and eschatological controversies. Instead, the author gives the reader and student the tools to delve into the Scriptures and discover the answers. Caution: This may lead the reader to question and even jettison some previously held views of the End of Times. While offering historical and theological background materials to consider, I believe the greatest value of this book is the study tools, guides and exercises it offers each student. The result is creating

Throughout each chapter, a variety of steadily more difficult exercises assess students' understanding of the material and promote improved comprehension and critical-thinking skills. This incremental approach to instruction and assessment makes it easier for beginning readers to absorb and master new information. The Fourth Edition includes new chapters on analyzing arguments and sentence relationships. In addition, there is a greater emphasis on recognizing and understanding verbal clues to meaning, new discussions on how the brain learns and remembers new information, and several new engaging readings.
