The contributors to this anthology include classroom teachers, librarians, university educators, and journalists. They speak not only to the technologically capable and media-savvy teachers but also to the curious, who seek starting points for using new technologies alongside traditional print media in their classrooms. They show how multimedia and digital technologies expand our approaches to literacy education -- and how to extend and enrich our use of stories, whatever the media, with all ages. Their articles cover a vast range of subjects arranged into 5 sections. This book provides current information, classroom examples, and anecdotes as practical tools to help teachers use digital, media, and print texts to extend students' learning. Blackboard Oct 08 2020 A captivating meditation on education from the author of The Yellow-Lighted Bookshop In Blackboard, Lewis Buzbee looks back over a lifetime of

experiences in schools and classrooms, from kindergarten to college and beyond. He offers fascinating histories of the key ideas informing educational practice over the centuries, which have shaped everything from class size to the layout of desks and chairs. Buzbee deftly weaves his own biography into this overview, approaching his subject as a student, a father, and a teacher. In so doing, he offers a moving personal testament to how he, "an average student" in danger of flunking out of high school, became the first in his family to graduate from college. He credits his success to the well-funded California public school system and bemoans the terrible price that state is paying as a result of funding being cut from today's budgets. For Buzbee, the blackboard is a precious window into the wider world, which we ignore at our peril. "Both anecdotal and eloquent, *The Yellow-Lighted Bookshop* is a tribute to those who crave the cozy confines of a bookshop, a place to be 'alone among others' and savor a bountiful literary buffet." --Booklist (starred review)
