**Polymer Matrix Composites:
Materials Usage, Design,
and Analysis** Aug 06 2020 The
third volume of this six-volume
compendium provides
methodologies and lessons
learned for the design,
analysis, manufacture, and

field support of fiber-
reinforced, polymeric-matrix
composite structures. It also
provides guidance on material
and process specifications and
procedures for using the data
that is presented in Volume 2.
The information provided is
consistent with the guidance

provided in Volume 1, and is an
extensive compilation of the
current knowledge and
experiences of engineers and
scientists from industry,
government, and academia who
are active in composites. The
Composite Materials
Handbook, referred to by

industry groups as CMH-17, is a six-volume engineering reference tool that contains over 1,000 records of the latest test data for polymer matrix, metal matrix, ceramic matrix, and structural sandwich composites. CMH-17 provides information and guidance necessary to design and fabricate end items from composite materials. It includes properties of composite materials that meet specific data requirements as well as guidelines for design, analysis, material selection, manufacturing, quality control, and repair. The primary purpose of the handbook is to standardize engineering methodologies related to

testing, data reduction, and reporting of property data for current and emerging composite materials. It is used by engineers worldwide in designing and fabricating products made from composite materials.
